## Objective

---

Computer Science student (6th semester) at University of Central Punjab, seeking an internship opportunity to gain industry experience and contribute to software development projects. Strong foundation in programming, databases, web development, and problem-solving.

## Education

---

**BS Computer Science**, University of Central Punjab, Lahore **2022 – Expected 2026** Completed Credit Hours: 99 out of 133 (currently in 6th semester)

Relevant Coursework: Programming Fundamentals, Data Structures, Object Oriented Programming, Algorithms, Operating Systems, Database Systems, Artificial Intelligence, Cloud Computing, Networking, Web Application Development

## Skills

---

- **Languages:** Python, C++, JavaScript, HTML, CSS
- **Technologies:** GitHub, MySQL, Django (learning), React (learning)
- **Core CS Concepts:** OOP, DSA, Algorithms, Operating Systems, Networking, DBMS
- **Soft Skills:** Problem Solving, Teamwork, Time Management

## Projects

---

- **Student Management System (Django)** – A CRUD-based web app for managing student records, featuring user authentication, form validation, and efficient search functionality.
- **Weather App (React JS)** – Developed a responsive weather forecast application utilizing the OpenWeatherMap API, dynamic icon-based visualizations, and real-time updates.
- **Personal Portfolio Website** – Designed and launched a mobile-responsive portfolio to showcase skills, resume, and project highlights using HTML, CSS, and JavaScript, with a clean and interactive user experience.

## Extra-Curricular Activities

---

- Volunteered in technical workshops at UCP to assist juniors in programming labs.
- Passionate about self-learning and regularly follow coding tutorials and documentation to improve skills.
- Passionate about AI and exploring integration of web development with intelligent systems.
